

ANNA TOPPING

Boston, MA | itsannatopping@gmail.com | linkedin.com/in/anna-topping

SUMMARY

Sales Engineer with 5+ years of technical customer-facing experience spanning observability, DevOps, and SRE. Progressed from hands-on support and configuration engineering into a post-sales role at Datadog, combining deep platform expertise with the ability to translate complex technical concepts into clear business value for customers and stakeholders.

EXPERIENCE

Datadog | Boston, MA

Sales Engineer, Customer Success *November 2023 – Present*

- Partner with Customer Success teams to demonstrate Datadog's value, vision, and strategy to enterprise customers, supporting retention and expansion.
- Lead technical discovery to uncover complex monitoring, security, and observability requirements, then design and present tailored solutions that map platform capabilities to customer business goals.
- Serve as a trusted technical advisor throughout the customer lifecycle, building credibility with engineering and DevOps stakeholders.

Unqork | New York, NY

Lead Support Engineer *February 2022 – April 2023*

- Recruited, hired, and coached a team of support engineers, establishing processes that improved how customers managed complex no-code workflows.
- Advised customers on DevOps and SRE best practices, strengthening platform reliability and reducing operational risk.

Senior Support Engineer *July 2021 – February 2022*

- Designed and deployed strategic monitors across customer environments and servers, proactively catching performance issues before they caused outages.
- Directed a summer intern-led data analysis initiative that identified patterns in incident response, informing process improvements adopted by the support team.

Configuration Support Engineer *April 2020 – July 2021*

- Developed subject-matter expertise in Unqork's no-code configuration platform, resolving complex customer technical issues.
- Built internal and customer-facing tools for bulk data management and automated incident-priority calculation, streamlining support operations.
